## MAVERICKS

Mavericks is a surfing location in Northern California, USA. It is located approximately 2 miles (3.2 km) from the shore off of Pillar Point Harbor. After a strong winter storm in the northern Pacific Ocean, waves can routinely crest at over 25 feet (7.6 m) and top out at over 80 feet (24 m). The break is caused by an unusually shaped underwater rock formation.

Maverick's is a winter destination for some of the world's best big wave surfers. Very few riders become big wave surfers; and of those, only a select few are willing to risk the hazardous, sometimes deadly, conditions at Maverick's. An invitation-only contest is held there most winters, when the waves come. Mavericks can be seen highlighted in a movie titled Chasing Giants- depicting a story of a local surfer who made a name for himself at Mavericks.

## HIKING

There are several great local trails that will lead you up to breathtaking views and unparalleled scenery. Higgins Purisima trail is about 15 minutes south of Half Moon Bay in the redwood forests. The trail is popular among outdoor enthusiasts and many locals. The trail is about 7 miles long and will take you up to the top of skyline road.

Another local favorite is Montara Mountain. Rising almost 2,000 feet you will find yourself where the sun often breaks through the clouds. Even when the sun continues to hide, there's still a chance that by the time you hike to the summit you'll be hiking above the clouds.
